

RRP HANDLE POLE BUSHING INSTALLATION GUIDE

Here is an easy way to install the bushing into the handle pole bottom piece. Note that bushings are made to be pressed in. Its supposed to be a tight fit to prevent turning .

1) Use a regular vise for the installation

2) Make sure to put a protective piece between the pole, the vise, and the bushing to prevent damage while applying pressure. Simply add pressure to the vise and insert the bushing nice and straight

3) Installation is complete just make sure the bushing have been inserted all the way.

Note: The RRP handle pole are designed to be pressed in only, do not install using force like a hammer otherwise it is possible to damage both the bushing and handle pole.
